EXPERIENCE

Blackcoffer, *Software Engineer*

July 2024 – Present

- **PreEmpt** (AI-powered Strategic Decision Intelligence Platform): Migrating a **production frontend** from HTML/CSS/JavaScript to **Next.js**, setting up complete **frontend architecture**, integrating APIs with an existing **Node.js + Express** backend, and deploying via **AWS Amplify**.
- Second lead across **3 projects** — involved in client calls, requirement discussions, and delivering frontend solutions using **React.js**, **TypeScript**, and **Elastic UI**.

Vesta: **Quality Assurance Platform by CheckInn**, *Software Developer Intern*

March 2024 – June 2024

- Improved CheckInn's web UI using **React.js**, **TypeScript**, and **Material-UI**, increasing user engagement by **15%** and reducing UI-related support tickets by **10%**.
- Debugged **PHP Laravel** APIs and contributed across multiple repositories, improving system performance and code review efficiency by **50%**.

Netfotech Solutions, *Software Engineer Trainee*

January 2024 – March 2024

- Developed the **BookMyStall** application using **React.js** and **Tailwind CSS**, ensuring seamless performance across mobile and desktop platforms, resulting in a **20% increase** in user satisfaction.

PROJECTS

SubTrack — Subscription & Spend Intelligence Platform

- Engineered a **full-stack subscription tracker** using **Next.js** and **Node.js/Express** that **parses uploaded CSV/PDF** bank statements to automatically detect recurring charges — eliminating manual categorization entirely.
- Built an **analytics dashboard** with **multi-month spend trend charts**, at-risk renewal detection, and category-level breakdowns (streaming, productivity, utilities) so users can act on subscriptions before charges hit.
- Implemented a **proactive alert system** with renewal reminders and **weekly digest notifications**, reducing the chance of unwanted charges by surfacing at-risk subscriptions ahead of billing cycles.

Cityscope — Full Stack Community Platform — [Explore Here](#)

- Architected and shipped a **full-stack community platform** from scratch using **React**, **TypeScript**, **Tailwind CSS**, **Node.js**, and **PostgreSQL** — covering auth, content creation, and social interactions (likes, replies, filtering).
- Secured the API layer with **JWT authentication** and **Prisma ORM** for type-safe DB access; deployed frontend on **Vercel** and backend on **Render** achieving zero-downtime continuous deployment.

TECHNOLOGIES

Languages: Python, C, C++, JavaScript, TypeScript

Front-end: Next.js, React.js, Redux, Zustand, React-Query, Tailwind CSS

Back-end: Node.js, Express.js, NextAuth, Prisma ORM, CloudFlare Workers, PostgreSQL, MongoDB

Tools: Git, VS Code, Postman, AWS Amplify, PyScripter

ACHIEVEMENTS

- Samyak IT Solutions: Completed Data Structures internship with top honours.
- Solved 350+ problems on LeetCode; achieved a global ranking of 968 in a competitive coding contest.

EDUCATION

Manipal University Jaipur — BTech, Computer and Communication Engineering

Sept 2020 – May 2024
